

leaving footprints in the sands of time

Embracing its heritage, the location was formerly occupied by a clinic and grocery store in the 60s, which were located next to one of the UAE's first petroleum pumps. Now the three single-story stone buildings have been transformed, including the addition of a one-of-a-kind saltwater spa. Featuring just five rooms, its contemporary feel masterfully combines aspects of its original features, blended together with luxe modernity.
